1. 자연수의 혼합계산

()가 있는 덧셈/뺄셈/곱셈의 혼합 계산

문제지번호 6035976D

2020-05-27

계산을 하세요

$$\textcircled{1} (20-12) \times 3 + 34 = 58$$

$$\textcircled{8} 3 \times (18 - 14 + 13) =$$

$$\textcircled{2} 3 \times (14 + 17) - 92 =$$

$$\textcircled{9} 33 + (58 - 8 \times 4) =$$

$$\textcircled{3} 7 \times (5 + 3) \times 5 =$$

$$\textcircled{10} 5 \times (6 + 7) \times (18 - 16) =$$

$$\textcircled{4} 2 \times (45 - 15 - 29) =$$

$$\textcircled{11} 5 \times (5 + 6) \times 4 =$$

$$\textcircled{5} (34 - 28 + 15) \times 3 =$$

$$\textcircled{12} 2 \times (5 + 5) \times (18 - 16) =$$

$$\textcircled{6} 6 \times (19 - 17 + 11) =$$

$$\textcircled{13} 11 \times 5 - (19 + 15) =$$

$$\textcircled{7} 249 - (15 + 14) \times 8 =$$

$$\textcircled{14} 91 + (2 \times 3 - 2) =$$
