

The role of teachers and the impact on us.

1624 정유빈

What do you think the teacher does? People won't be able to say confidently what a teacher does. Also, not all teachers can be the same because they have their own colors. But in common, teachers are jobs that teach students. I think a teacher is a leader who helps students grow up.

The reason why I think teacher is a leader because it is the teacher who leads and teaches students at school. Let's assume that we are in school and there is no teacher. Will the school work out smoothly? It won't be. For example, suppose that break time is 10 minutes and class time is 50 minutes. In most cases, event occurs for 10 minutes, shorter than 50 minutes. And they are responsible and coordinate these things. If we make adjustments ourselves without teachers, it will be very complicated. Like this, teachers have a great influence on students. So rules and order are well followed.

Therefore, I think teachers are the leaders of students. As mentioned earlier, teachers have a lot of influence on us. Also if the teacher does not exist, we can predict our situation.

I think teacher is a great.

How do you think about teacher?
